

## **Standards and percentages of textual citation and Plagiarism**

On 21/7/2015 the approval of the esteemed minister obtained the regulations concerning the criteria and percentages of the text quote and Plagiarism, as follows:

- Unification of the rules of examination of the detection of quotation and Plagiarism in the program for all users by the universities and the Ministry represented by the Department of Research and Development and the supervision and scientific assessment that exclude the simple quote (less than 1%) and the correct quotation between the quotation marks and sources.
- The use of the program to detect the citation and Plagiarism of all universities, provided that all universities contribute to the purchase and under the supervision of the Ministry to grant the authority to use the researcher and committees to examine plagiarism in colleges and universities where it was proposed to use the program (Turnitin) branch of the Ithenticate program in the largest database is commonly used globally in universities And impact factor Journals.
- If the scientific or scientific committee or the scientific resident is determined to deliberately deviate the student to the effort of others, claiming that his scientific efforts in certain parts of the research, especially in the Subjects (practical applications, practical results, recommendations and summary) refuse to search.
- 15% of the total number of letters and university transcripts that have been circulated in the examination form for the scientific supervision and assessment system shall be based on not exceeding 5% of one source.
- 20% of scientific research is based on scientific promotion research which will be published or will be accepted for publication after 2/1/2016, provided that this research does not contain scientific theft in order to allow for the education and implementation of the workshops on the culture of the three concepts in universities (Plagiarism).
